All Figures are Rolling 12 Mths

About This Report

The Beer - Imports and Exports Report is a monthly publication providing a complete view of imports and exports of Beer into and out of the US marketplace over the preceding 24 months. The report allows readers to view overall trends by package type as well as details for each individual country.

The report is assembled from data provided by the Customs and Census Bureaus and is published approximately 6 weeks after the end of each month as the data becomes available. Descriptions of the various data sets can be found at the end of this publication.

Generally speaking, the six-month or longer trends are more indicative of overall market trends. Short-term trends can be highly volatile and are impacted by suppliers' fiscal year, market inventory adjustments, and logistical timing for imports.

About the Cover: The cover graphically displays rolling twelve month industry trends (across Beer, Spirits, and Wine) since 2003.

The price of this publication is dependent on the subscriber's business scale. Please see our website for the specific rates (<http://www.bw166.com>). Subscribers are allowed to share the publication across their company and with majority-owned subsidiaries. The publisher prefers that the publication is shared electronically and viewed on a digital device to reduce the impact on the environment. Subscribers are responsible to limit distribution only to their employees, employees of their majority-owned subsidiaries and consultants working on projects specific to the subscriber.
